SUMMARY

Product Designer with 10 years of experience spanning UI/UX, accessibility, and AI-driven product development. Expert in creating intuitive AI interfaces, enterprise SaaS platforms, and accessibility tools trusted by 1M+ websites. Key achievements include building an internal audit tool that accelerated accessibility expert workflows by 60%, designing an Accessibility Checker that significantly grew dashboard adoption, and currently integrating Figma-to-code workflows with MCP and AI tooling at a fast-moving AI startup.

EXPERIENCE

Senior Product Designer

[Signus.ai](#) Mar 2026

- Established MCP integration connecting Figma to Claude Code for an AI-powered eSignature and document workflow platform, significantly accelerating design-to-development handoff and reducing iteration cycles.
- Maintained consistent, scalable component delivery by leveraging Figma design system expertise and accessibility standards.
- Spearheaded go-to-market design — investor and SDR presentations, LinkedIn branding, and visual identity for product launch.
- Designed a PLG tooling suite of 8 AI-powered tools: AI Agreement Generator, AI Risk Analyzer, Convert to PDF, PDF Protector, AI Signature Generator, Secure PDF Redactor, AI Handwriting Analyst, and Accessible PDF Maker.
- Led design of the public API website page, translating developer-facing concepts into clear, engaging UI.

Product Designer

[LevelAccess](#) Feb 2025 – Mar 2026

- Conducted systematic gap analysis between the live platform and design system, driving additions that unified the product experience.
- Led post-acquisition integration, unifying the UserWay widget within LevelAccess to eliminate product-switching friction.
- Designed the widget management interface, resolving critical UX pain points surfaced through customer research.
- Ran structured customer interviews via Maze and live calls, converting findings into roadmap improvements.
- Collaborated with PMs and tech leads daily — presenting proposals and shaping sprint priorities and roadmap direction.
- Partnered with marketing design to ensure brand consistency across all platform touchpoints.

UI/UX Designer → Product Designer

[UserWay \(Acquired by LevelAccess\)](#) Oct 2021 – Feb 2025

- Progressed from UI/UX design on the public website to Product Designer for the Widget and Dashboard, deployed on over 1 million websites globally.
- Designed and launched the Accessibility Checker tool, significantly increasing dashboard adoption and converting a new segment of enterprise customers.
- Created the Regulation Tracker page — a compliance monitoring feature built in partnership with Google.

- Designed the Accessibility MS Word Add-in enabling document remediation directly within Microsoft Word.
- Built a Chrome extension (internal audit tool) that accelerated accessibility expert audits by 60%.

UI/UX Designer

[Ukrtech.info](#) *Jul 2019 – Oct 2021*

- Designed admin panels and personal account dashboards focused on clear information hierarchy.
- Led design of corporate websites, landing pages, and advertising banners aligned with client brand identities.
- Produced corporate branded materials — business cards, flyers, and notebooks.

Template Creator & Web Designer

[TemplateMonster \(MotoCMS\)](#) *Feb 2015 – Jul 2019*

- Designed and built landing pages, banner assets, and e-commerce websites on the MotoCMS platform.
- Performed cross-device QA across Desktop, Tablet, and Mobile, reducing post-release bug reports.
- Reviewed and quality-checked remote contractor templates, maintaining output standards.
- Collaborated with QA, DevOps, and design teams in planning and review meetings.
